

Capital Plan 2015 - 2019

New York City Transit

Project: T7070345
Description: Culver Line Structure Rehabilitation Wrap-Up - Design Only
Category: Line Structures
Element: Line Structure Rehabilitation

This project will provide design funding for a wrap-up contract to the rehabilitation of the Culver Line Viaduct completed in 2016. Outstanding issues include unsatisfactory drainage, leaking expansion joints and premature deterioration of structural braces. Construction will be addressed in a future capital program. Schedule dates are not available, due to project being under development.
